Answers to your questions about contact lenses ...

Aren't they uncomfortable?

In most cases, not at all. Today's breathable materials and contact lens solutions have improved greatly over the years.

Aren't they expensive?

Actually, the price has come down over the years. Many disposable lenses cost around \$5 each, and daily disposables can be below \$1 per lens.

I really like my new glasses.

Why get contacts?

It's often nice to have both options. You can wear regular sunglasses ... they don't fog up in the cold. You get full peripheral vision. And, you may just want them for social occasions.

So, could contact lenses be for you?

The doctors and staff at Aurora Vision Center are happy to show you the options.

Amy Treichel-Brandt, OD
Optometrist
